CareBidet

curaco Carebidet

Smart Care / Smart Life for Bedridden People

" We Care to make you Better "

UP

Personal hygiene
Physical comfort
Human dignity

GOOD

Cost-effective
Easy to use
Environment-friendly

DOWN

Burden of caregivers
Healthcare costs
CO_2 / Waste

FREE

Paper diaper
Smell / Noise
Worries / Stress

Paradigm Shift
from paper diaper to Carebidet

Who is it for?

Bedridden patients: the elderly, ill and disabled
Hospitals, Hospices, Welfare facilities, Senior-care facilities, Assisted-living facilities, Nursing homes

Why use it?

For care receivers: bedridden patients including the elderly and the disabled

To improve personal hygiene
To provide physical comport as it detects urine and/or feces, automatically flushes, rinses, and air-dries
To uphold human dignity as it helps patients not to be ashamed or embarrassed
To help reduce fungal infections on the skin through prompt excrement disposal and air-dry feature
To prevent bladder infection and/or urinary tract infection often caused by use of paper diaper
To maintain emotional stability as it makes patients feel clean and fresh
To help relieve constipation and fecal incontinence

For care givers: family members, nurses, aides, carers, and health care facilities

To ease pressure on caregivers as the essential part of care being handled by Curaco Carebidet
To save time and efforts as diaper change is not required at night
To be free from odor, dirt, and mess
To get information on how many times the patient excretes

Economic and Environmental Effect

Curaco has significant economic and environmental impacts on users and societies.

Economic impact

Lower healthcare costs by reducing time and resources for nursing care
Inevitable strategy to address the shortage of caregivers in the ageing society
New paradigm in the healthcare industry shifting from disposable paper diaper to Curaco Carebidet
Highly efficient quality service provision with state-of-the-art technology
New care robot that takes care of excrement disposal for the bedridden

Environmental impact

Ecologically responsible choice to use less amounts of disposable paper diaper
Less CO_2 emissions from industrial waste, contributing to prevent global warming

What is Curaco Carebidet?

Curaco Carebidet is the nursing care bidet (Automatic Toileting Aid System) for the bedridden.

This ergonomically designed bidet is invented for people with limited mobility such as the elderly, patients, and the disabled.

When Curaco Carebidet detects urine and/or feces with its advanced built-in sensors, it automatically flushes excrement away, rinses, and air-dries the user's body, ensuring cleanness and comfort for the user without use of disposable paper diaper.

Proven Worldwide

CareBidet technology is proven worldwide through internationally recognised approvals and real-world adoption in advanced care systems.

In the USA, it is FDA Class II registered and CMS reimbursement eligible. In Japan, it is registered under the Long-Term Care Insurance (LTCI) system and holds PSE electrical safety certification.

It is also CE certified for EU safety standards, supported by 110+ patents and recognised through major global innovation awards.

About WeissenBlu

WeissenBlu Assistive (Makswide Pty Ltd) is the authorised Australian distributor of CareBidet by Curaco.

We provide automated hygiene and toileting support solutions that help people receive more dignified, consistent care, while reducing caregiver burden through practical, technology-enabled support, product information, resources, and enquiry pathways.

We prioritise structured onboarding and caregiver training to help users and carers adopt the system safely and confidently, with support designed around real-world care routines.
