

CareBidet Pricing, Rental and Trial Options

Transparent pricing pathways for families, NDIS participants and procurement teams.

Our Approach to Pricing

WeissenBlu believes families and facilities should be able to make continence care decisions with clarity, not pressure. Every CareBidet® arrangement includes a 2-week trial, giving users, carers and clinicians time to evaluate fit before any long-term commitment.

Rental and purchase pathways are both available, and we work with NDIS, Home Care Package and aged care procurement funding channels.

Pricing at a Glance

Option	Cost	What's Included
Monthly Rental	\$1,490 ex GST / month	Device, delivery, installation, training, ongoing service
Trial Period	2 weeks included	On both rental and purchase pathways
Purchase	On request	Long term or facility wide deployment
Clinical Assessment	Free*	No obligation consultation before commitment

**All Trials are free exempting the initial consumable cost for non-replaceable artefacts.*

Understanding the True Cost of Care

When comparing options, it is important to look beyond the monthly device fee. Pads, wipes, linen changes, laundry, waste disposal and, most significantly, carer time all form part of the real cost of continence care. In many home and facility settings, these hidden costs are substantial.

Illustrative Cost Considerations (Home Setting)

Cost Category	Traditional Care	With CareBidet
Disposable pads and liners	High weekly spend	Substantially reduced
Wet wipes	High weekly spend	Approximately 97% reduction (pilot data)
Linen and laundry	Frequent changes	Substantially reduced
Carer time (per episode)	Longer, physically demanding	Shorter, automated
Manual handling injury risk	Elevated	Reduced

Note: A documented pilot in a Sydney home care setting recorded approximately A\$988 per week in direct consumable savings alongside meaningful reductions in carer time and log rolls. Individual results will vary based on care needs and prior consumable use.
